

BIOHACKATHON

biosolution for waste management

What, where, and when?

The Biohackathon focuses on participants developing solutions to industry-related problems.

We aim to encourage participants to use their knowledge to **solve biotechnological problems**. Completing the BioHackathon tasks will require participants to synergize different disciplines, work effectively in teams, and study existing solutions.

Active participation of the scientific advisory board guarantees the participants **reliable feedback, development of the idea, and possibly even implementation of the created solution.**

24-26 May 2024 onsite in Warsaw, Poland

Day 1: Team formation, lectures on biotechnology in environmental protection, and team-building events. Starting work on a solution.

Day 1-3: Task execution, thematic workshop.

Day 3: Presentation and evaluation of ideas. Announcement of winners.

Who we are looking for?

- a **biological, chemical, and related science student, at least in their second year.**
- students interested in environmental protection, ecology, and biological technologies.
- ambitious, creative, and think outside the box.

General outcomes:

The winners will receive an attractive prize and goodies. 1 ETCS point is provided for participation in the event. All competitors will leave richer knowledge, new contacts, and pleasant memories.

Participation is free of charge
Deadline for registration is 21st April 2024
